Key driver for conversion

CELLULAR CONVERSION

14.92%

Highest channel yield

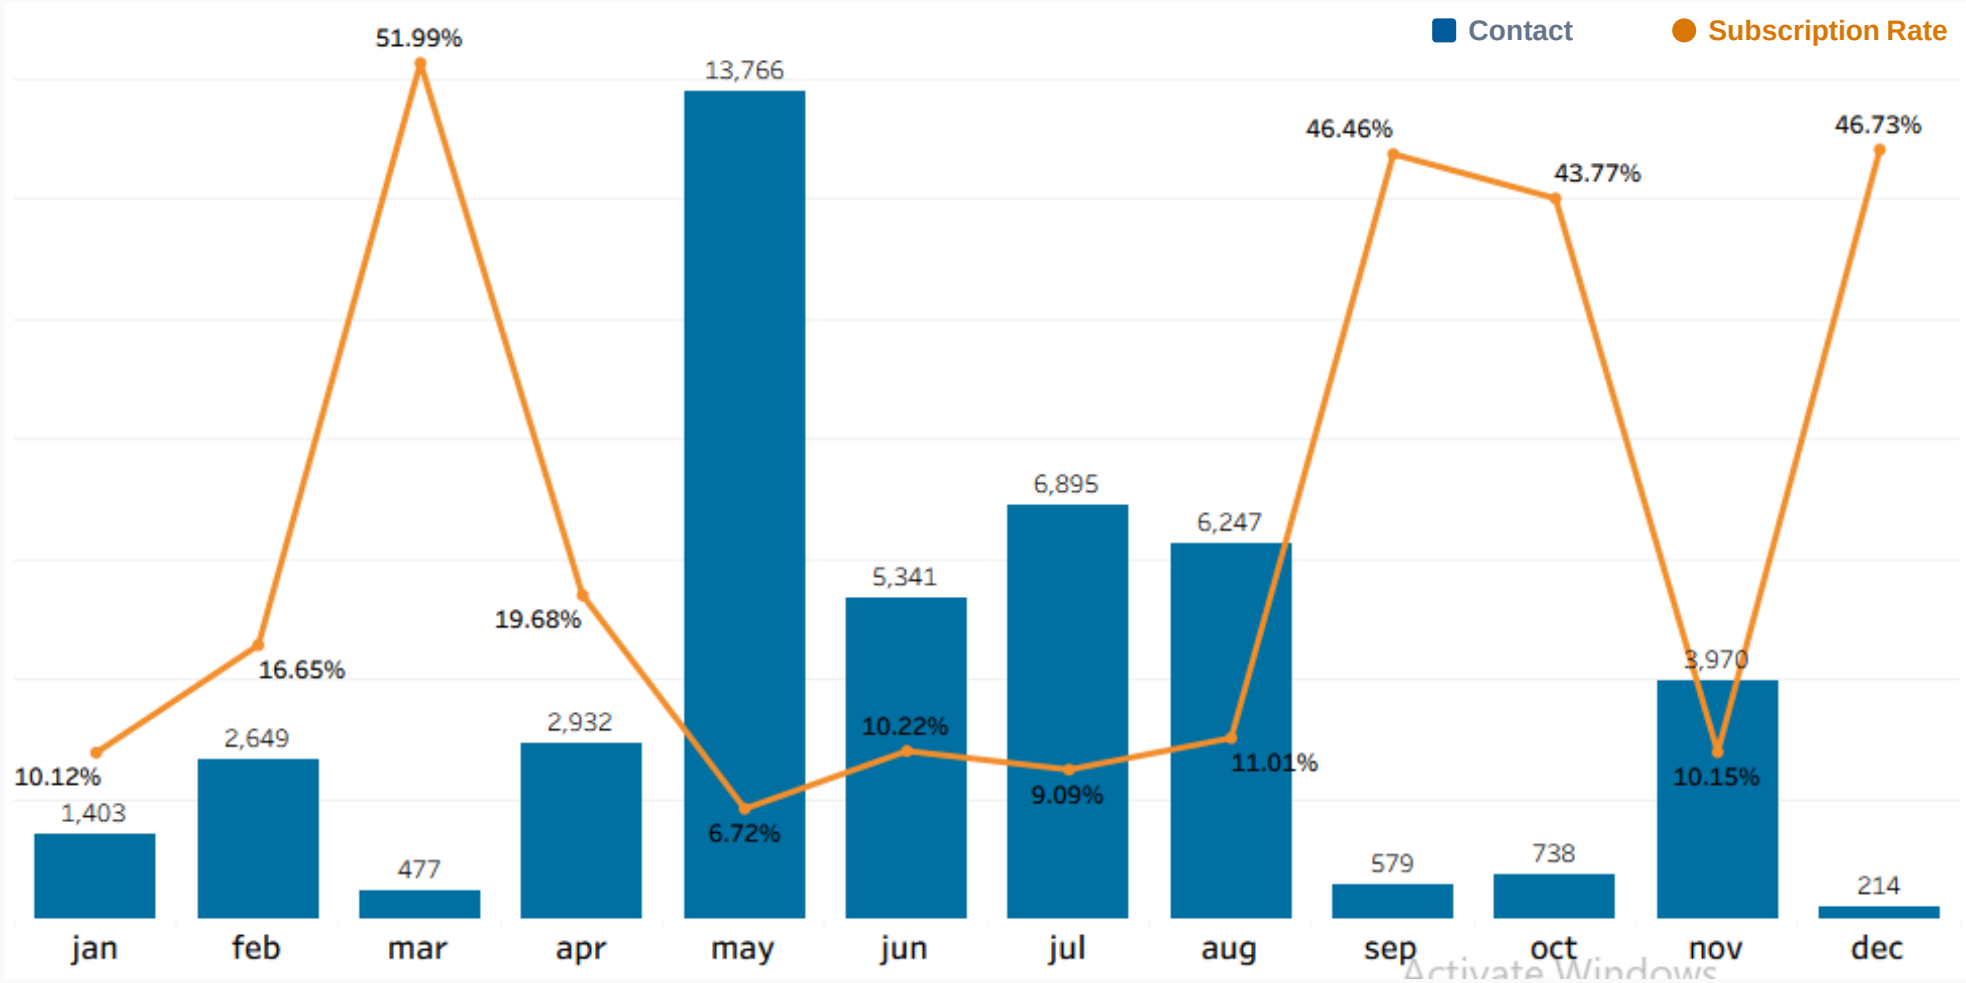

Strategic Baseline

11.7% conversion baseline: Conversion is heavily concentrated in specific customer segments and seasonal calling windows.

SEASONALITY & TIMING ANALYSIS

Subscription Rate by Month

Monthly Contact (Bars) vs. Subscription Rate % (Line)

May Volume Bottleneck

13,766 calls made in May yielded only 6.72% conversion. High agent fatigue, low subscription efficiency.

Peak Efficiency Windows

March (51.99%), September (46.46%), October (43.77%) and December (46.73%) generate maximum campaign ROI per call.

Subscription Rate By Job Profile

	Job_Profile	Total_Calls	Contacts	Subscription_Rate	Bounce_Rate
1	student	2157	938	28.68	71.32
2	retired	5313	2264	22.79	77.21
3	unemployed	3169	1303	15.50	84.50
4	management	27091	9458	13.76	86.24
5	admin.	13317	5171	12.20	87.80
6	self-employed	4505	1579	11.84	88.16
7	unknown	953	288	11.81	88.19
8	technician	22083	7597	11.06	88.94
9	services	11292	4154	8.88	91.12
10	housemaid	3498	1240	8.79	91.21
11	entrepreneur	4163	1487	8.27	91.73
12	blue-collar	27415	9732	7.27	92.73

Students and Retired

Students (28.68%) and **Retired** (22.79%) are the banks absolute best converters. They are locking in deposits at double or triple the rate of other job profiles.

Corporate Base (Management & Admin)

Management (13.76%) and **Admin** (12.20%) has moderate subscription rates around the bank campaign's global baseline average (~11.7%). With over 14,600 contacts combined, a tiny increase in their conversion efficiency results in a huge surge of actual deposit volume.

Blue-Collar Workers

Largest volume of phone calls 27415 went to this group with abysmal 7.27% subscription rate. sales team is wasting an incredible amount of time calling blue-collar leads for very little return

CUSTOMER SEGMENTATION

Age Group Analysis

Seniors & Young Adults

Senior (42.26%) and Young Adults (23.95%) are the banks best 2 performing age group . They also make quick decisions requiring the shortest conversion talk time at average of just 6.66 minutes.

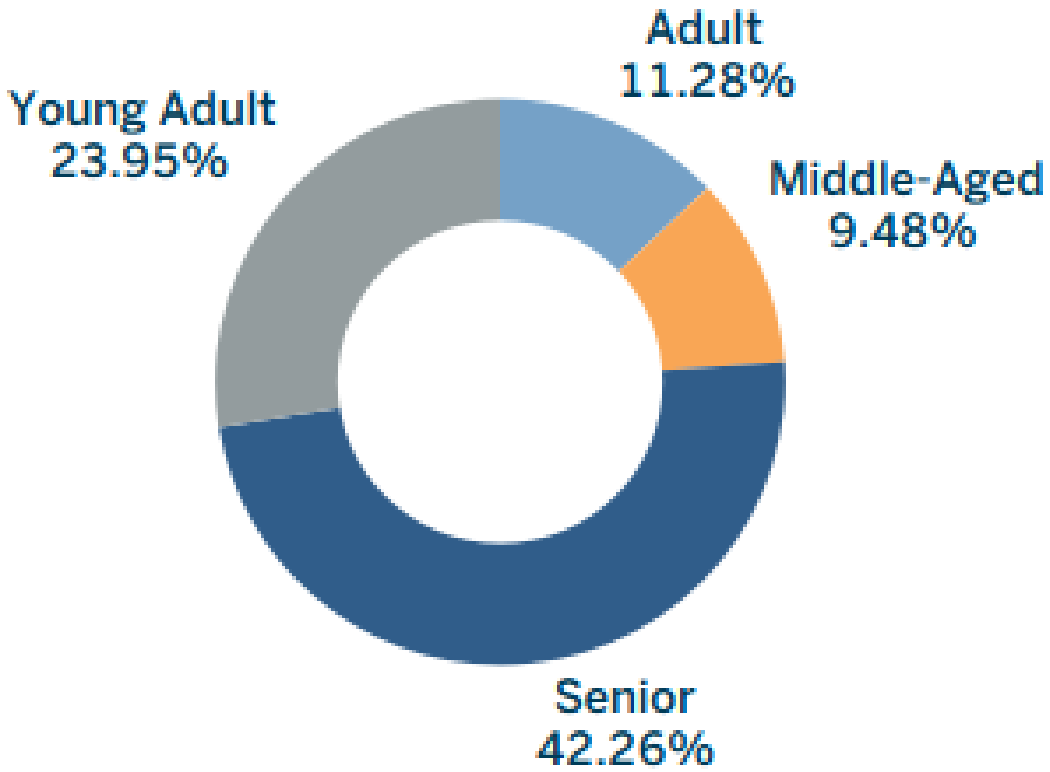

The Operational Reality

Despite being the banks absolute best segments, the marketing team barely targeted them. Together, Seniors and Young Adults make up less than 6% of total customers contacted (2,524 out of 45,211).

Adults & Middle-Aged

The bank poured 94.4% of its total call volume (42,687 customers combined) into these two groups. Their Subscription Rates drop significantly to 11.28% for Adults and a rock-bottom 9.48% for the Middle-Aged. To win a subscription from these groups, sales agents are forced to stay on the phone for 9.20 to 9.64 minutes per successful call, massive waster of call center labor for low returns.

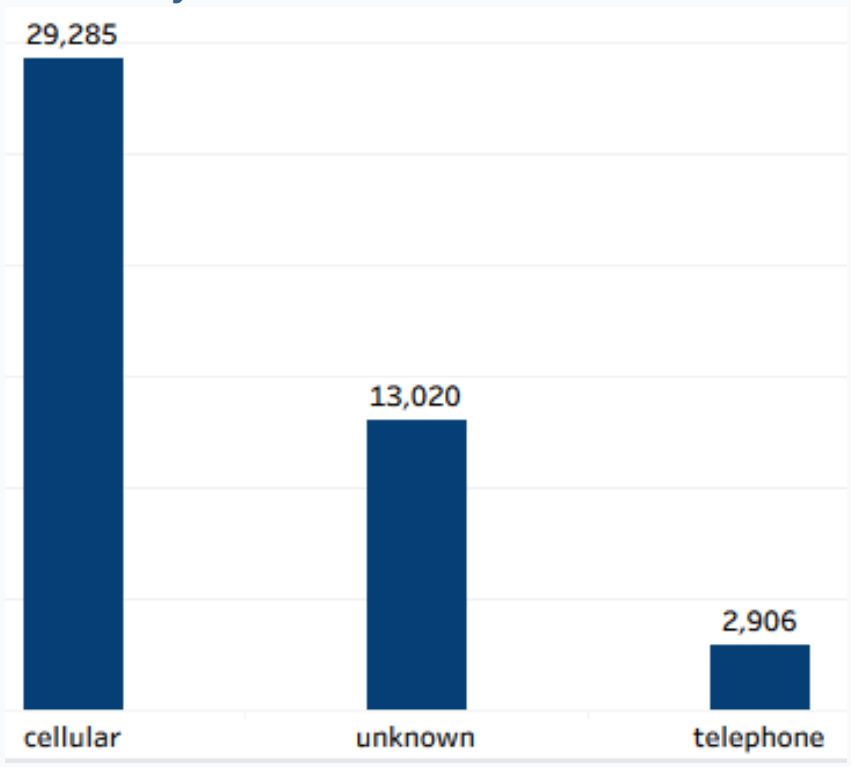

Age Group Conversion Curve

CAMPAIGN CHANNEL ANALYSIS

Campaign Channel Utilization & Yield Analysis

Contact by Channel

Subscription Yield % by Channel

Cellular Subscribers: 4,369 14.91% Conversion

Unknown Subscribers: 530 4.07% Conversion

Telephone Subscribers: 390 13.42% Conversion

Cellular Dominance

Cellular is the bank's core operational channel. It manage 64.8% of all outreach; yields highest overall subscription rate (14.92%).

Unknown Channel Drain

13,020 calls with missing channel data produce an abysmal 4.07% conversion. Channel is actively draining the banks marketing budget and wasting valuable sales hours.

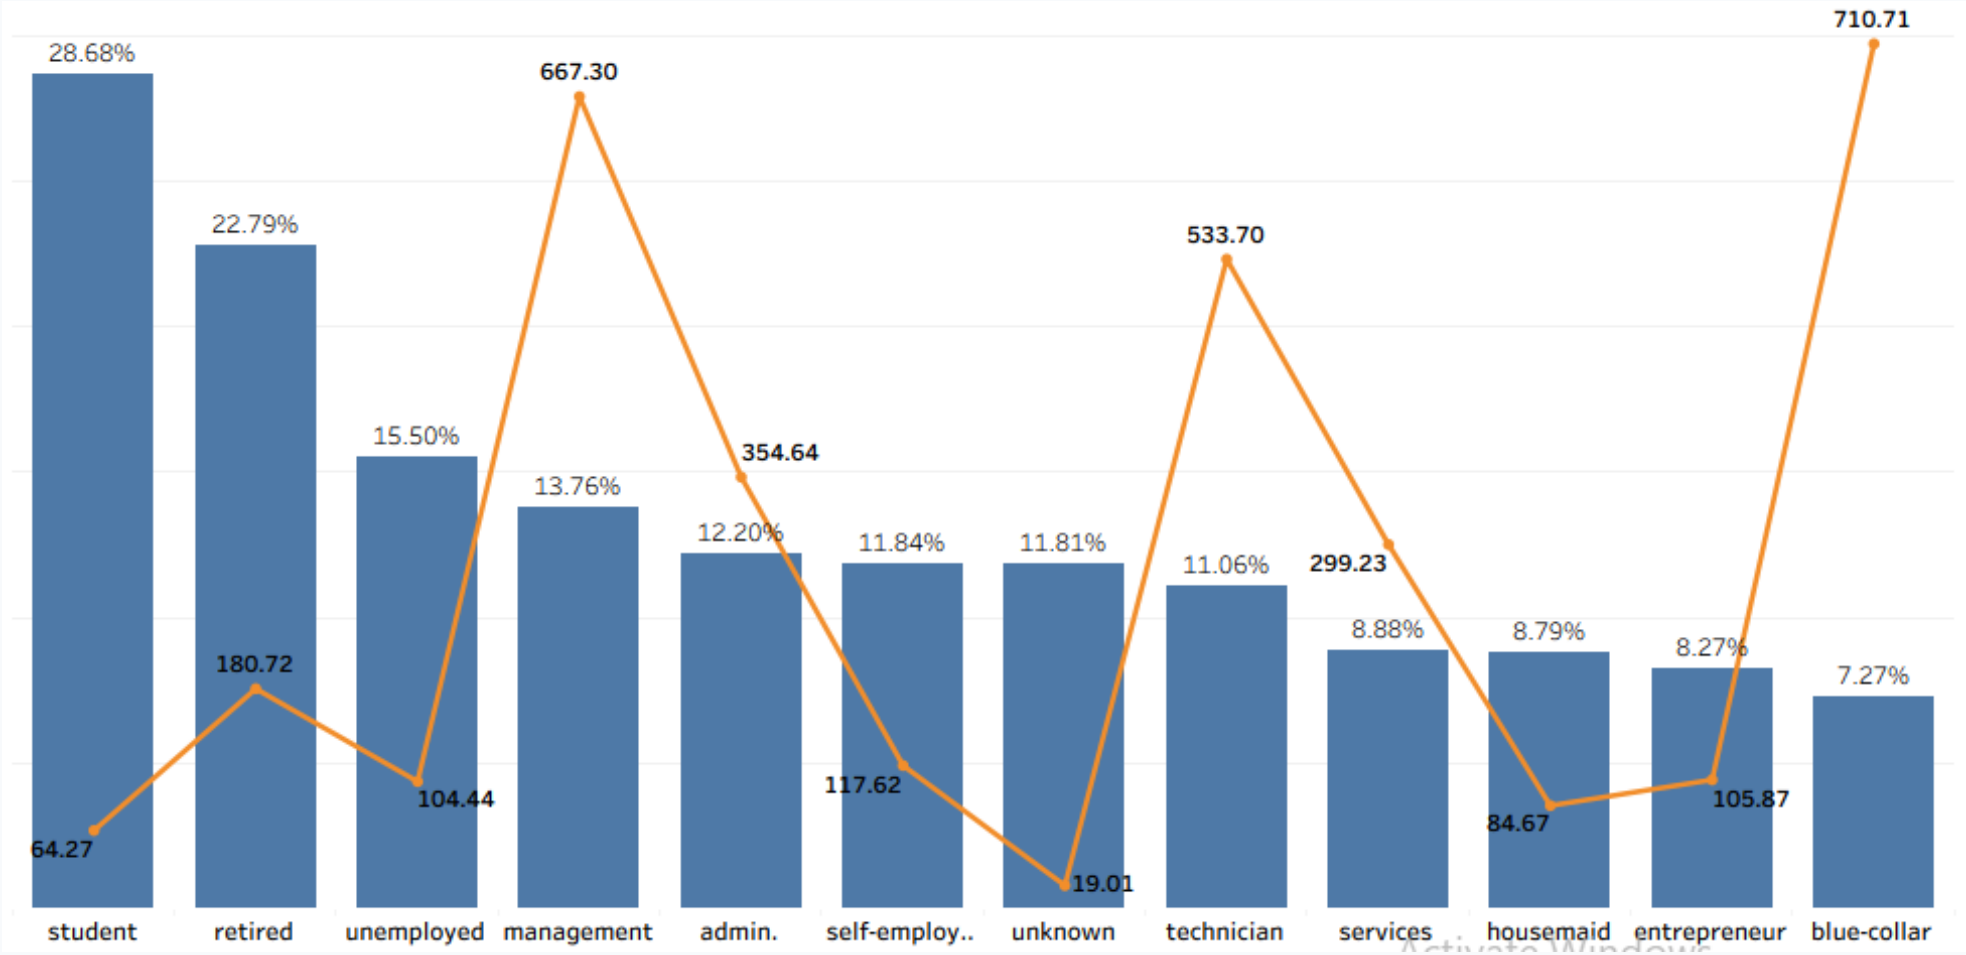

Telephone

This represent a tiny fraction of the bank's campaign (2,906 contacts) but deliver very solid and stable 13.42% Subscription Rate. The time-to-close a deal (8.46 minutes) is identical to a mobile phone. The bank should scale up and continue utilizing this channel.

CAMPAIGN CHANNEL ANALYSIS

Campaign Channel Utilization & Yield Analysis

(Subscription Rate (bar) vs Call Time (hrs) line) by Job Type

Operational Imbalance

The best-converting segments/demographics **Student & Retired** did not get enough call hours

Over-Targeting the Wrong Groups:

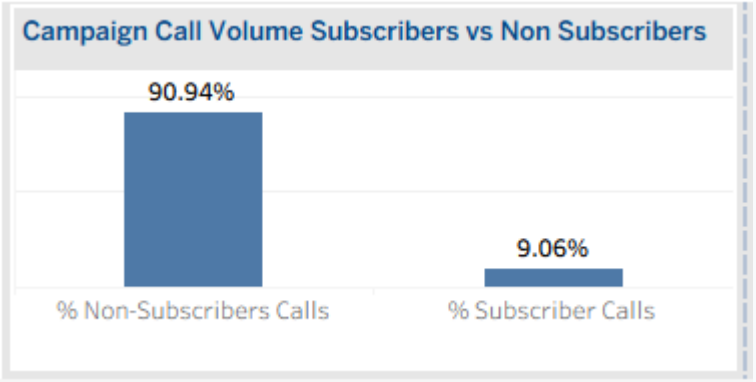

Sales team spent thousands of hours talking to middle-aged professional segments (**Blue-collar or Services)** that consistently said “no”. resulting in massive wasted call hours

CAMPAIGN CHANNEL ANALYSIS

Campaign Channel Utilization & Call Volume Breakdown

Campaign Call Volume Breakdown

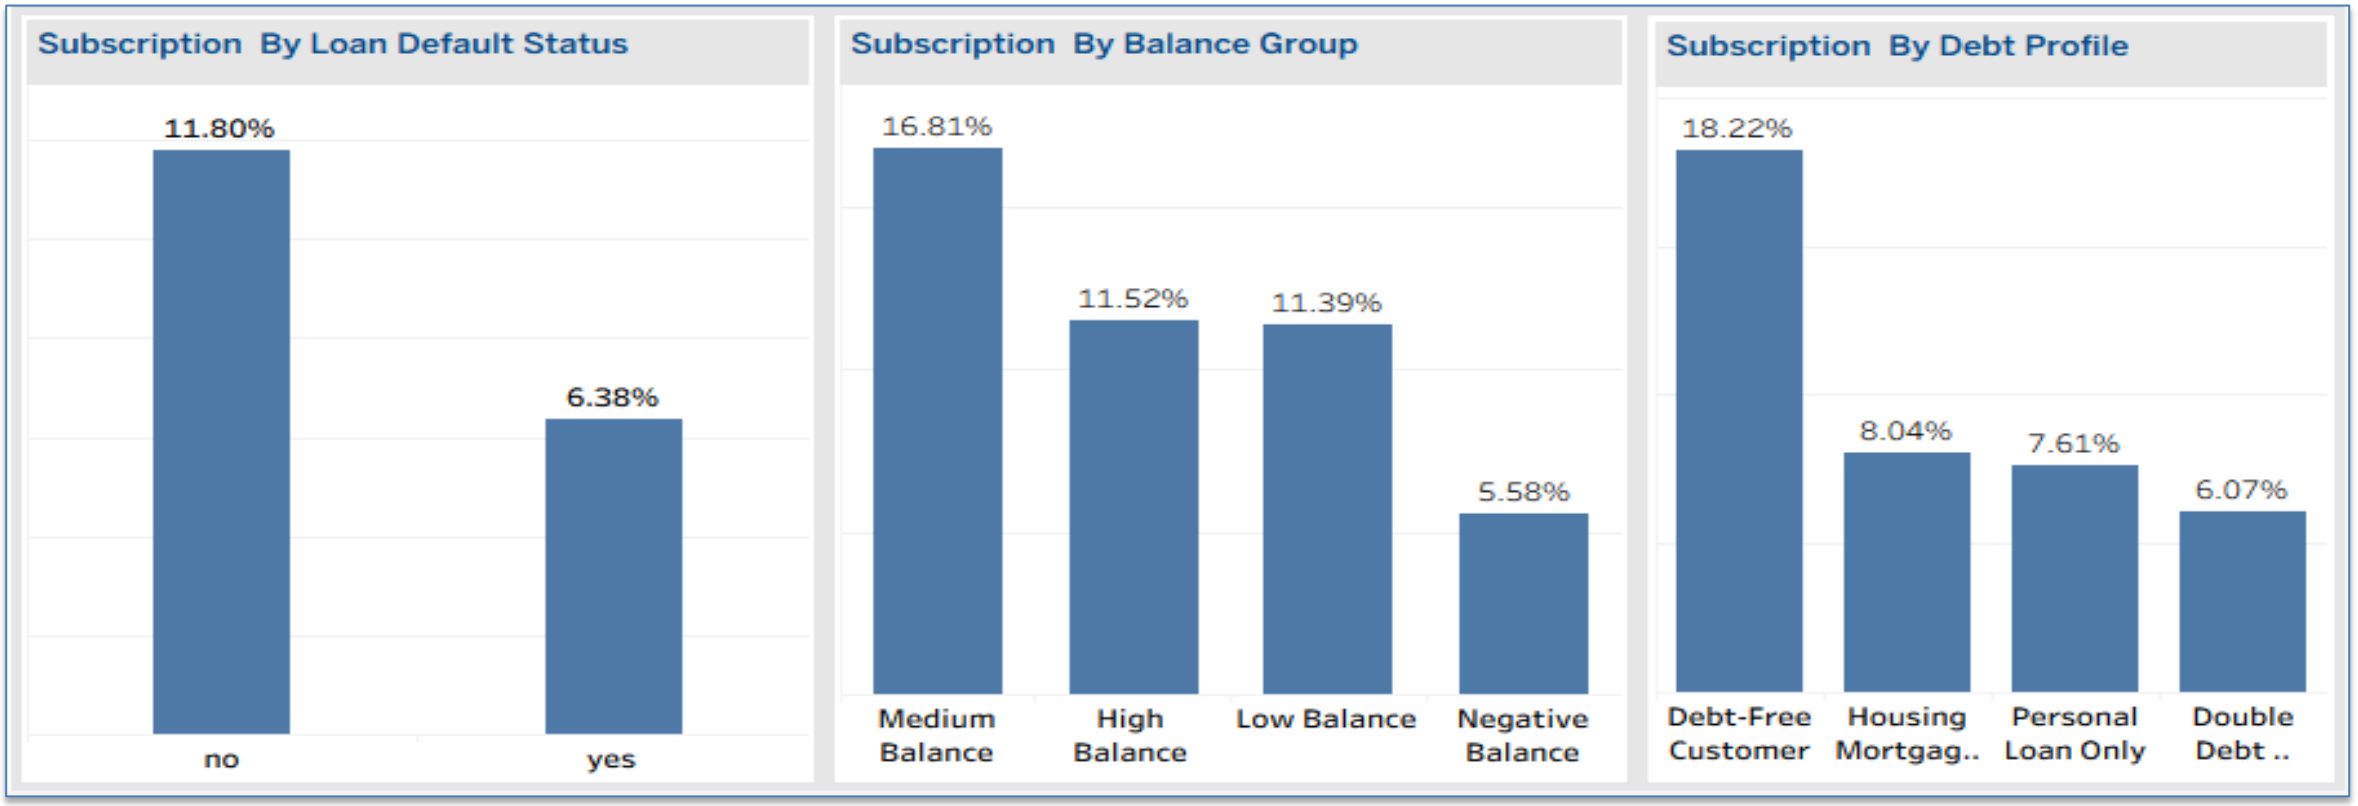

Contact	Total Campaign Call	Total Non-Subscribers	Total Subscribers
cellular	78,780	69,703	9,077
telephone	9,883	8,948	935
unknown	36,293	34,981	1,312
Grand Total	**124,956**	**113,632**	**11,324**

Labor & Call Hours Loss

Sales team spent hours calling **39,922** customers that consistently said “no” with some phones dialed multiple times totaling **113,632** calls. With majority of this call going to demographics with low subscription performance and customers with missing/unknown records, phone calling this list blindly siphoned **90.94%** of the banks campaign budget.

Investment Capability

Loan Default Status - Strong Predictor

Takeaway: To protect campaign efficiency, minimize outreach to profiles with a recorded loan default history.

Medium Beats High Balance

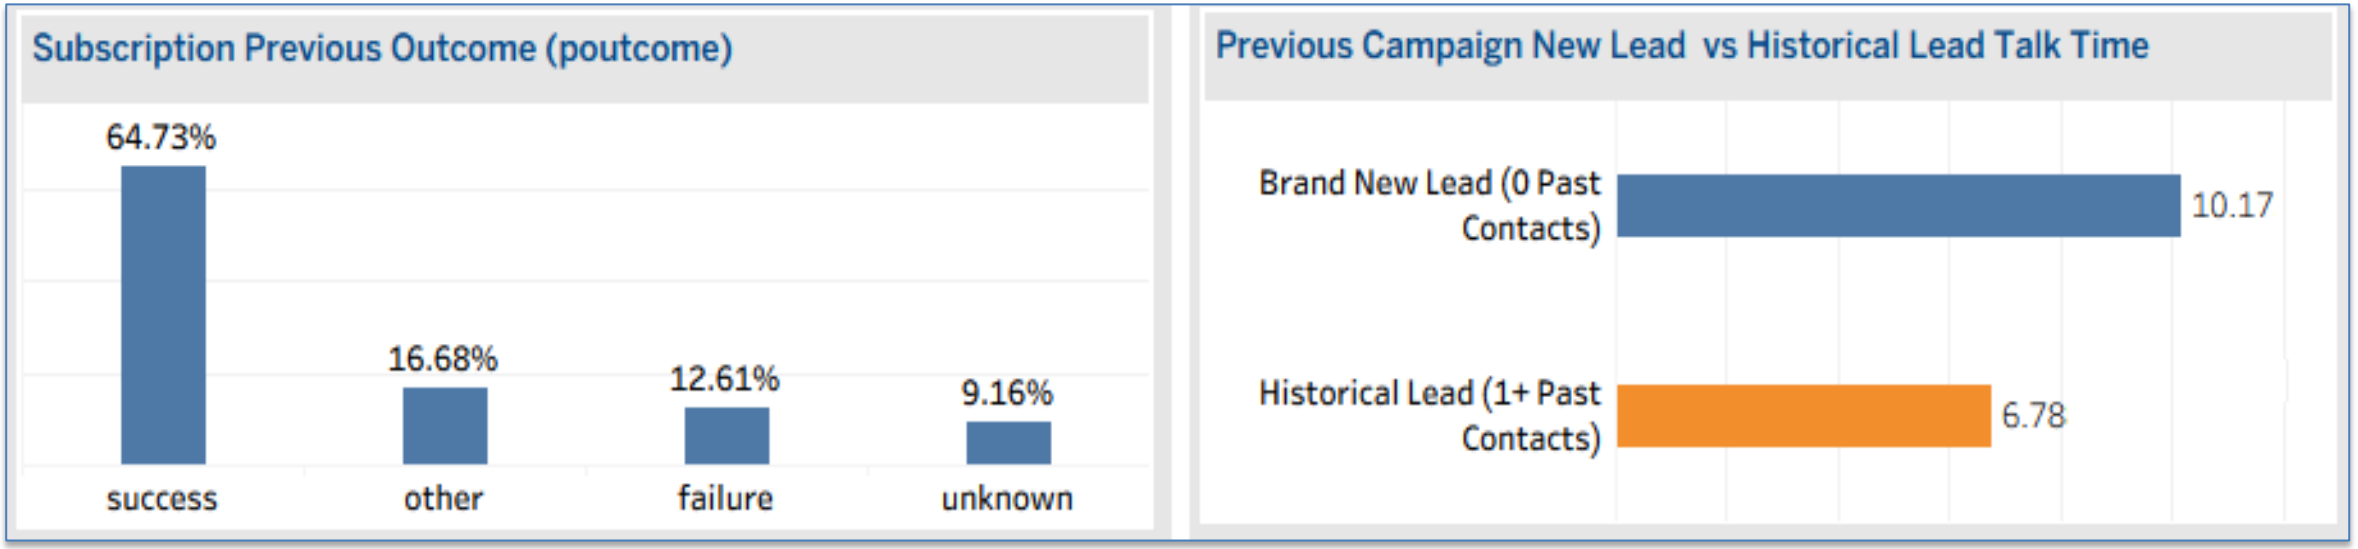

Takeaway: Prioritize the "Medium Balance" demographic. High-balance users might be too selective or using other wealth management channels, while negative-balance users lack the capital to subscribe.

Debt Profile Suppress Conversion

Debt-Free is King: Customers who are completely Debt-Free convert at a stellar 18.22%. Financial liability is a massive barrier to a customer saying "yes. Weigh marketing efforts toward debt-free individuals.

CUSTOMER ENGAGEMENT HISTORY

Historical Engagement (Prior Campaign Outcome)

Prior Campaign Success ('Success')

Clients who subscribed in previous campaigns convert at an astounding 64.73% rate (963 subscribers out of 1,511 contacts).

Previous Failures (Failure)

Clients with non-conversion past history convert at 12.61% upon re-engagement.

Relationship Equity is Strong

Historical Leads: This segment of customers require the shortest talk time to win a conversion, call agents only need to speak with them for an average of 6.78 minutes. They already trust the brand, hence, sales pitch is short and direct.

Brand New Leads: To win a subscription from a brand-new lead, call agents have to talk for a massive average of 10.17 minutes.

TIMING AND SEASONALITY

Review Period Top 3 Performing Job Profiles

Students and Retired Profiles Dominant

Out of the 12 months in the year, **Students** hit the Top 3 list 8 times, and **Retired** individuals hit it 6 times.

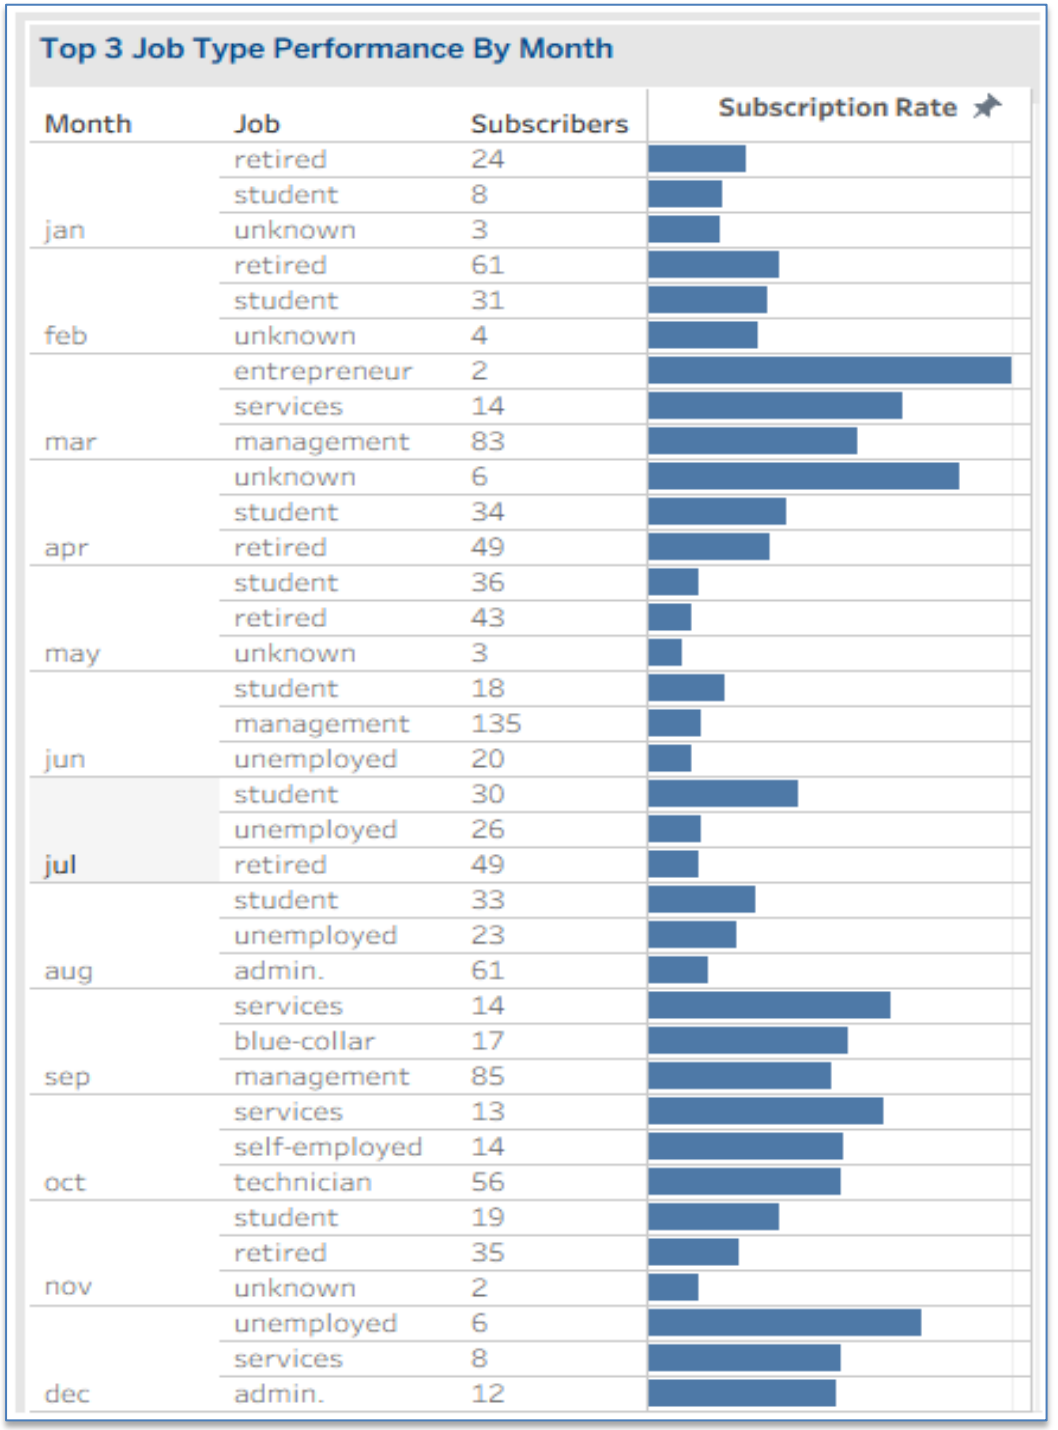

Management & Admin High - Volume Valuable to The Bank

Management (Months 3, 6, 9) and Admin (Months 8, 12) represent massive pools of potential customers. With subscription rate above the banks baseline, they are more valuable to the bank's bottom line than profiles with a 100% conversion rate on 2 contacts.

Extreme Subscription Spikes With Low Call Volume

Month 3 (Entrepreneur):100.00% subscription rate (2 contacts)
Month 4 (Unknown): 85.71% subscription rate (7 contacts)
Month 12 (Unemployed): 75.00% subscription rate (8 contacts)

Key Takeaway: While subscription rate is, the small audience sizes cannot sustain a massive bank campaign.

Job Profile

Priority Tier

Tier 1 and 2 are the banks high performing demographics to maximize total campaign revenue.

Priority Tiering By Top Performing Job Profile

Strategic Priority	Job	Total Contact	Subscription Rate
Tier 1: High Efficiency (Immediate Target)	student	938	28.68%
	retired	2,264	22.79%
Tier 2: High Volume (Core Revenue)	admin.	5,171	12.20%
	management	9,458	13.76%
Tier 3: Moderate Potential	unknown	288	11.81%
	unemployed	1,303	15.50%
	self-employ..	1,579	11.84%
	technician	7,597	11.06%
Tier 4: Deprioritize / Restructure Strategy	housemaid	1,240	8.79%
	entreprene..	1,487	8.27%
	services	4,154	8.88%
	blue-collar	9,732	7.27%
		45,211	**11.70%**

Debt Profile

Debt-Free Customers

Debt-Free customers are Caixa Bank most responsive and lucrative segment. 1 in 5 Debt-Free Customer subscribe, converting at 18.22%.

They are not burning cash on monthly interest payments, they have surplus capital available to lock away into the bank's term deposits to earn interest.

Priority Tiering By Debt Profile

Debt Profile	Subscription Rate	Avg Call Time
Debt-Free Customer	18.22%	4.30
Housing Mortgage Only	8.04%	4.35
Personal Loan Only	7.61%	4.16
Double Debt (Housing + P..	6.07%	4.20
	11.70%	**4.30**

Missing Data Gaps Across Critical Dimensions

unknown_edu	unknown_edu_subscribers	unknown_job	unknown_job_subscribers	unknown_contact	unknown_contact_subscribers	poutcome	poutcome_subscribers
1857	252	288	34	13020	530	36959	3386

Unknown & Missing Data Gaps

Data gaps are costing CaixaBank massive efficiency leaks, particularly in the contact channel **13,020** and (poutcome) previous outcome **36,959** fields.

(poutcome): A massive 36,959 rows are marked as unknown. While this group generated 3,386 subscriptions, their Subscription Rate is a low 9.16% (3,386 ÷ 36,959), confirming that when the bank doesn't track a lead's historical relationship, call agents are flying blind and getting rejected 91% of the time.

Strategic Roadmap, Operational Recommendations & Action

Immediate Actions for The Next Campaign

• **Operational Resource Shift:** Reallocate 85% of live agent calling hours to Tier 1 Demographics (Students/Retired) and Warm Contacts (>30 days since interaction).

• Filter out low-balance accounts, focus outbound calls strictly on clients in the **Medium Balance Group**: $1,804 – $5,000 with active no loans prior to campaign launch.

• Deprioritize massive phone/outreach campaigns to **Tier 4** . Use low-cost, fully automated email or SMS track rather than wasting expensive live telemarketing agent hours and labor on them.

• Reduce call volume in May by 50% and shift telemarketing agents to March, September, and Q4 windows.

• Institute a strict 3-call limit per customer contact cycle to eliminate lead burnout.

• Maintain Cellular as baseline communication channel. It offers the best combination of volume 64.8% of all outreach , speed-to-close 8.39 minutes, and conversion probability 14.92%.

•Continue utilizing Telephone channel. Though it represent a tiny fraction of the bank's campaign (2,906 contacts), it deliver a very solid and stable 13.42% Subscription Rate.

• Discontinue Unknown Contact Channels, it is actively draining the banks marketing budget and wasting valuable sales hours because of poorly logged outreach attempts.

• Implement a "Talk-Time Cap" Rule: Since "Unknown" calls stretch to 14 minutes, if a call on an unverified channel crosses the 9-minute mark without a clear commitment or closing path, the agent must politely end the call to reclaim sales capacity.

• Establish monthly campaign capacity caps based on historical seasonal conversion. Limit determined by how well customers historically convert during that specific month.

• **Prioritize Historical Lead Funnel:** The bank should strictly exhaust all historical campaign (**success**) lists *before* launching cold outreach. Warm leads yield a 2.5x higher sales return in much shorter time frames.

Strategic Roadmap, Operational Recommendations & Action

Long Term Actions for The Next Campaign

• Implement a Lead scoring model prioritizing **Young Adults, Seniors** for age group , **Students, Retired, Management, Admin** for job profile, **Tertiary-educated** for education, and **Debt-free** profiles.

• Implement a scoring model prioritizing **Young Adults, Seniors** for age group , **Students, Retired, Management, Admin** for job profile, **Tertiary-educated** for education, and **Debt-free** profiles.

• Implement a data-governance rule on CRM that blocks call agents from submitting or launching campaigns against accounts missing a specified data to eliminate the "Unknown" bucket.

• Migrate Landlines to Mobile Tracks: During successful landline calls, instruct agents to request a mobile number to naturally migrate these highly stable customers into the banks high-volume digital or automated SMS/app messaging streams.

• Mandate call duration optimization training focused on building rapport during minutes 2 to 5.

• **Reallocate Agent Capacity:** Assign Caixa Bank most experienced, high-performing sales agents to the **Brand New Lead** pool (where the sales friction is highest) and allow junior agents or automated channels to handle the high-converting **Historical Leads**.

•Continue calling the 3,386 subscribers sitting inside the unknown poutcome, 252 unknown education, 34 unknown job, 530 unknown contact channel to instantly update their profile so that they are accurately profiled for next campaign.
